EDUCATION

MARTA ABREU UNIVERSITY
Master's in Web Development

Learning advanced skills to design, develop, and maintain high-quality applications and websites. The curriculum included topics such as programming languages (HTML, CSS, JavaScript, etc.), popular frameworks and libraries, frontend and backend development, databases, web security, user experience (UX), application optimization, and deployment, among others. Prepared to tackle complex challenges in the field of web programming and contribute to the development of innovative web projects.

December 2018

MARTA ABREU UNIVERSITY
Automation Engineer

Specialized in designing, developing, and maintaining automatic systems that regulate and adjust processes and devices without human intervention. Capable of optimizing the performance, efficiency, and accuracy of complex systems such as industrial machines, autonomous vehicles, power systems, and more, through the use of algorithms, sensors, and actuators.
